Campus Climate Survey discussion:
- Dialogue with vendors, making sure they know it is not a “One Stop Shop”
- Skip sexual misconduct questions on future surveys, and come with more targeted questions
- Response rate not very good from students, discussed ideas on how to change/improve
  - Peer mentors, have them help find students to be a voice; nominate students
  - Filter questions; provide more of a breakdown of demographic groups
  - Other efforts to figure out why students did not take the survey
- Discussed students not necessarily knowing what was happening as a result of these efforts
- Discussed strategies for engaging students in implementation of programs, etc. to help shape change
- Add the ISU Initiative link to new website; share this information when responding to students/media
- Create links on other department’s web pages
- Timely warnings are discussed by students; is there a way to provide additional information?
  - When the Daily covers warnings, add the Sexual Misconduct Initiatives link to their story
  - Helps highlight the efforts that are occurring, so no misperception that action is only responsive
  - Open Forum regarding Timely Warnings: good way to get information to students, faculty, staff
